Products can be found in one of three ways

- 1) The easiest way to find a product is to select the Product Listing by A-Z from the tool bar

OR

- 2) The most popular products are listed on the main page under favorites and some products have been prearranged based on therapeutic effect
Simply click on the tabs from the main page and look at product line

- 3) Use the search bar at the top of the webpage to look for a specific product

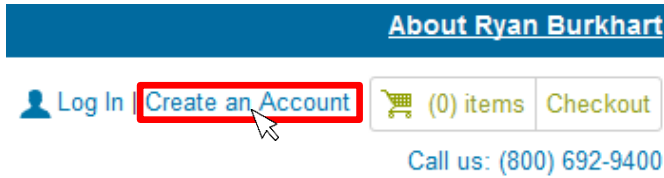

The search function is very sensitive to spelling. If a recommended product does not come up right away, it is typically due to a spelling error or extra spacing.

For example, the product **UltraInflamx** might be entered as either of the incorrect entries: *Ultra Inflamx* or *UltraEnflamx*. Both would yield no search results.
